The conversion of the points of the other curricula will be calculated by means of a simple rule of three. This evaluation is classificatory.

### **5.2 Final result of the selection for Master's or Doctorate**

The final grade (NF) will be the result of the average of the grades of the Project evaluation (AP) and the test of titles (PT), and the ranking will be presented in decreasing order, according to the formula:

$$NF = (AP + PT) / 2$$

NOTE: In the case of a tie, the highest grade will prevail in the following order: test of titles and project evaluation.
